

Trane FreshEffects™

Ventilation is critical for fresher, more comfortable air throughout your home. Trane FreshEffects is an energy-efficient way to handle lingering bad odors and improve the quality of the air inside your home.

- Energy Recovery Ventilator
- Trades indoor air with fresh outdoor air
- 24/7 automatic ventilation

Every Trane FreshEffects™ Energy Recovery Ventilator is packed with high-quality components. Each helps ensure that you can count on FreshEffects to deliver fresh air, time after time. Today's homes are better insulated and tightly sealed to save energy. This prevents a number of home odors (cooking smells, pet odors, paint or new carpet fumes) from escaping. Trane FreshEffects helps these fumes and odors to dissipate by bringing fresher outdoor air into your home.

- Static plate energy transfer core means efficient transfer of heat and moisture
- High performance, permanently lubricated ball-bearing motor
- Slide-out filter for easy cleaning
- Percent timer control
- Passive defrost-condensate drain not required
- Multi-position mounting
- Heavy gauge, powder-painted steel cabinet
- Closed cell foam gasketing for insulation integrity
